Education

North Carolina State University Aug 2021 - May 2027 *(expected)*
Doctor of Philosophy (Ph.D.), Electrical Engineering GPA: 4.0
Advisor: Tianfu Wu
Research Focus: Continual Learning & Fine-Tuning of Large Language Models

Savitribai Phule Pune University Aug 2014 - Jun 2018
Bachelor of Engineering, Electronics & Telecommunication Engineering GPA: 3.84

Publications

Employment

Shopify
Research Intern, Agentic Foundation Modeling Jan 2026 - Present

- Building sandbox environments and Reinforcement Learning algorithms for efficient web agents.

North Carolina State University
Graduate Research Assistant, Department of ECE May 2022 - Dec 2025

- *Parameter Efficient Fine-Tuning*: Developed a novel PEFT method that outperformed prior state-of-the-art approaches with 8 times reduction in trainable parameters (Published at ICML 2025)
- *Continual Learning*: Developed a Continual Learning method leveraging Neural Architecture Search to dynamically learn task-specific model architectures (Published at CVPR 2026)

Graduate Student Researcher, Plant Sciences Initiative Dec 2021 - May 2022

- Developed a platform for semi-supervised bounding-box annotations using image stitching with Metashape API
- Implemented Docker containerization for the code with robust interruption and termination safeguards

Persistent Systems Ltd.

Senior Software Engineer, Machine Learning — Apr 2021 - Jun 2021

- Trained multi-modal deep learning models for document recognition, achieving 0.97 F1 score across 500+ categories
- Developed MLOps pipelines and model deployment solutions to AWS SageMaker using Python and Jenkins
- Created Python SDKs to standardize model training and evaluation across the data science team
- Created automation scripts for distributed image and text data processing using PySpark for ∼350,000 data points

Persistent Systems Ltd.

Software Engineer, Machine Learning — Mar 2019 - Mar 2021

- Developed state-of-the-art image segmentation models for tumor cell detection from 3D microscopic blood scan images
- Increased the recall by 29.9% compared to existing commercial solutions while reducing the false positives by 62.87%
- Built a high-performance prediction framework for batch processing of ∼315,000 images

Academic Service

Reviewer

- Advances in Neural Information Processing Systems (NeurIPS) — 2024-2026
- International Conference on Learning Representations (ICLR) — 2025-2026
- International Conference on Machine Learning (ICML) — 2025-2026
- European Conference on Computer Vision (ECCV) — 2026

Technical Skills

Deep Learning Frameworks	PyTorch, HuggingFace Transformers, TRL
Data Science	Pandas, Spark, SQL
Programming Languages	Python
